TotalEnergies

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE FIRST THREE MONTHS 2024

(unaudited)

1) Basis of preparation of the consolidated financial statements

The consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and IFRS as published by the International Accounting Standards Board (IASB).

The interim consolidated financial statements of TotalEnergies SE and its subsidiaries (the Company) as of March 31, 2024, are presented in U.S. dollars and have been prepared in accordance with International Accounting Standard (IAS) 34 "Interim Financial Reporting".

The accounting principles applied for the consolidated financial statements at March 31, 2024, are consistent with those used for the financial statements at December 31, 2023.

The preparation of financial statements in accordance with IFRS for the closing as of March 31, 2024 requires the General Management to make estimates, assumptions and judgments that affect the information reported in the Consolidated Financial Statements and the Notes thereto.

These estimates, assumptions and judgments are based on historical experience and other factors believed to be reasonable at the date of preparation of the financial statements. They are reviewed on an on-going basis by General Management and therefore could be revised as circumstances change or as a result of new information.

The main estimates, judgments and assumptions relate to the estimation of hydrocarbon reserves in application of the successful efforts method for the oil and gas activities, asset impairments, employee benefits, asset retirement obligations and income taxes. These estimates and assumptions are described in the Notes to the Consolidated Financial Statements as of December 31, 2023.

Different estimates, assumptions and judgments could significantly affect the information reported, and actual results may differ from the amounts included in the Consolidated Financial Statements and the Notes thereto.

Furthermore, when the accounting treatment of a specific transaction is not addressed by any accounting standard or interpretation, the General Management of the Company applies its judgment to define and apply accounting policies that provide information consistent with the general IFRS concepts: faithful representation, relevance and materiality.

2) Changes in the Company structure

2.1) Main acquisitions and divestments

- **Exploration & Production**
  - In February 2024, TotalEnergies and its partner SOCAR (State Oil Company of the Republic of Azerbaijan) have completed the sale of 15% interest each in the Absheron gas field to ADNOC (Abu Dhabi National Oil Company). Following the completion of this transaction, TotalEnergies holds a 35% stake in the Absheron gas field alongside SOCAR (35%) and ADNOC (30%).

➢ **Integrated Power**

- In February 2024, TotalEnergies has finalized the acquisition of three gas-fired power plants with a total capacity of 1.5 GW in Texas from TexGen, a U.S.-based company for a net investment of $635 million.

➢ **Marketing & Services**

- In January 2024, TotalEnergies has finalized the partial divestment of retail network in Belgium and Luxembourg and the full divestment in the Netherlands to Alimentation Couche-Tard for 1.4 billion dollars.

2.2) Major business combinations

➢ **Integrated Power**

Acquisition of 1.5 GW Power Generation Capacity in Texas

In accordance with IFRS 3 “Business combinations”, TotalEnergies is assessing the fair value of identifiable acquired assets, liabilities and contingent liabilities on the basis of available information. A preliminary purchase price allocation has been done in the first quarter after the closing and will be finalized within 12 months following the acquisition date.

2.3) Divestment projects

As of March 31, 2024, there is no material divestment project recorded in “assets classified as held for sale”.

3) Business segment information

Description of the business segments

Financial information by business segment is reported in accordance with the internal reporting system and shows internal segment information that is used to manage and measure the performance of TotalEnergies and which is reviewed by the main operational decision-making body of TotalEnergies, namely the Executive Committee.

The operational profit and assets are broken down by business segment prior to the consolidation and inter-segment adjustments.

Sales prices for transactions between business segments approximate market prices.

The reporting structure for the business segments’ financial information is based on the following five business segments:

- An Exploration & Production segment that encompasses the activities of exploration and production of oil and natural gas, conducted in about 50 countries;
- An Integrated LNG segment covering the integrated gas chain (including upstream and midstream LNG activities) as well as biogas, hydrogen and gas trading activities;
- An Integrated Power segment covering generation, storage, electricity trading and B2B-B2C distribution of gas and electricity;
- A Refining & Chemicals segment constituting a major industrial hub comprising the activities of refining, petrochemicals and specialty chemicals. This segment also includes the activities of oil Supply, Trading and marine Shipping;
- A Marketing & Services segment including the global activities of supply and marketing in the field of petroleum products;

In addition the Corporate segment includes holdings operating and financial activities.

Definition of the indicators

Adjusted Net Operating Income

TotalEnergies measures performance at the segment level on the basis of adjusted net operating income. Adjusted net operating income comprises operating income of the relevant segment after deducting the amortization and the depreciation of intangible assets other than mineral interest, translation adjustments and gains or losses on the sale of assets, as well as all other income and expenses related to capital employed (dividends from non-consolidated companies, income from equity affiliates and capitalized interest expenses) and after income taxes applicable to the above, excluding the effect of the adjustments describe below.
The income and expenses not included in net operating income adjusted that are included in net income TotalEnergies share are interest expenses related to net financial debt, after applicable income taxes (net cost of net debt), non-controlling interests, and the adjusted items.

Adjustment items include:

a) Special items

Due to their unusual nature or particular significance, certain transactions qualifying as "special items" are excluded from the business segment figures. In general, special items relate to transactions that are significant, infrequent or unusual. However, in certain instances, transactions such as restructuring costs or assets disposals, which are not considered to be representative of the normal course of business, may qualify as special items although they may have occurred in prior years or are likely to occur in following years.

b) The inventory valuation effect

In accordance with IAS 2, TotalEnergies values inventories of petroleum products in its financial statements according to the First-in, First-Out (FIFO) method and other inventories using the weighted-average cost method. Under the FIFO method, the cost of inventory is based on the historic cost of acquisition or manufacture rather than the current replacement cost. In volatile energy markets, this can have a significant distorting effect on the reported income. Accordingly, the adjusted results of the Refining & Chemicals and Marketing & Services segments are presented according to the replacement cost method. This method is used to assess the segments' performance and facilitate the comparability of the segments' performance with those of its main competitors.

In the replacement cost method, which approximates the Last-In, First-Out (LIFO) method, the variation of inventory values in the statement of income is, depending on the nature of the inventory, determined using either the month-end prices differential between one period and another or the average prices of the period rather than the historical value. The inventory valuation effect is the difference between the results under the FIFO and the replacement cost method.

c) Effect of changes in fair value

The effect of changes in fair value presented as an adjustment item reflects for trading inventories and storage contracts, differences between internal measures of performance used by TotalEnergies' Executive Committee and the accounting for these transactions under IFRS.

IFRS requires that trading inventories be recorded at their fair value using period end spot prices. In order to best reflect the management of economic exposure through derivative transactions, internal indicators used to measure performance include valuations of trading inventories based on forward prices.

TotalEnergies, in its trading activities, enters into storage contracts, whose future effects are recorded at fair value in TotalEnergies' internal economic performance. IFRS precludes recognition of this fair value effect.

Furthermore, TotalEnergies enters into derivative instruments to risk manage certain operational contracts or assets. Under IFRS, these derivatives are recorded at fair value while the underlying operational transactions are recorded as they occur. Internal indicators defer the fair value on derivatives to match with the transaction occurrence.

3.1) Information by business segment

1st quarter 2024 (M$)	Exploration & Production	Integrated LNG	Integrated Power	Refining & Chemicals	Marketing & Services	Corporate	Intercompany	Total
External sales	1,318	2,659	7,082	24,533	20,671	15	-	56,278

[(a)] *Adjustments include special items, inventory valuation effect and the effect of changes in fair value.*

The management of balance sheet positions (including margin calls) related to centralized markets access for LNG, gas and power activities has been fully included in the Integrated LNG segment.

Effects of changes in the fair value of gas and LNG positions are allocated to the operating income of Integrated LNG segment.

Effects of changes in the fair value of power positions are allocated to the operating income of Integrated Power segment.

1st quarter 2023 (M$)	**Exploration & Production**	**Integrated LNG**	**Integrated Power**	**Refining & Chemicals**	**Marketing & Services**	**Corporate**	**Intercompany**	**Total**
Total expenditures	4,052	1,195	1,234	225	159	35	-	6,900
Total divestments	31	49	149	8	301	-	-	538
Cash flow from operating activities	4,536	3,536	(1,285)	(851)	(673)	(130)	-	5,133

3.2) Adjustment items

The main adjustement items for 2024 are the following:

1) An “Inventory valuation effect” amounting to $ 107 million in net operating income for the Refining & Chemicals and Marketing & Services segments;

2) An “Effect of changes in fair value” amounting to $(320) million in net operating income for the Integrated LNG and Integrated Power segments;

3) An impairment of $(644) million in net operating income of the Company’s minority stake in Sunpower and Maxeon, based on their market value for the Integrated Power segment;

4) Capital gains on disposal for an amount of $ 1,507 million in net operating income generated in particular on the partial divestment of retail network in Belgium and Luxembourg and the full divestment in the Netherlands for the Marketing & Services segment. This amount includes the revaluation of shares held and consolidated under the equity method in Belgium and Luxembourg.

The detail of the adjustment items is presented in the table below.

ADJUSTMENTS TO NET OPERATING INCOME

(M$)		Exploration & Production	Integrated LNG	Integrated Power	Refining & Chemicals	Marketing & Services	Corporate	Total
1st quarter 2024	Inventory valuation effect	-	-	-	93	14	-	107
	Effect of changes in fair value	-	38	(358)	-	-	-	(320)
	Restructuring charges	-	-	-	-	-	-	-
	Asset impairment and provisions charges	-	-	(644)	-	-	-	(644)
	Gains (losses) on disposals of assets	(9)	-	-	-	1,516	-	1,507
	Other items	(13)	-	(54)	-	-	(4)	(71)
Total		**(22)**	**38**	**(1,056)**	**93**	**1,530**	**(4)**	**579**

4) Shareholders' equity

Treasury shares (TotalEnergies shares held directly by TotalEnergies SE)

	December 31, 2023	March 31, 2024
Number of treasury shares	**60,543,213**	**65,716,125**
Percentage of share capital	2.51%	2.75%

At its meeting on February 6, 2024, the Board of Directors decided, following the authorization of the Extraordinary Shareholder's Meeting on May 25, 2022, to cancel 25 405 361 treasury shares bought back between August 25, 2023 and October 26, 2023.

Dividend

On February 6, 2024, the Board of Directors, after approving the financial statements for fiscal year 2023, decided to propose to the Shareholders' Meeting on May 24, 2024 the distribution of an ordinary €3.01 dividend per share for fiscal year 2023. Subject to the Shareholders' decision, considering the first three interim dividends already decided by the Board of Directors, the final ordinary dividend for the fiscal year 2023 will be €0.79 per share.

Dividend 2023	First interim	Second interim	Third interim	Final*
Amount	€0.74	€0.74	€0.74	€0.79
Set date	April 26, 2023	July 26, 2023	October 25, 2023	February 6, 2024
Ex-dividend date	September 20, 2023	January 2, 2024	March 20, 2024	June 19, 2024
Payment date	October 2, 2023	January 12, 2024	April 3, 2024	July 1, 2024

*Subject to the Shareholder's decision on May 24,2024

The Board of Directors, at its meeting on April 25, 2024, set the first interim dividend for the fiscal year 2024 at €0.79 per share. The ex-dividend date of this intermin dividend will be September 25, 2024 and it will be paid in cash on October 1st, 2024.

Earnings per share in Euro

Earnings per share in Euro, calculated from the earnings per share in U.S. dollars converted at the average Euro/USD exchange rate for the period, amounted to €2.23 per share for the 1st quarter 2024 (€1.96 per share for the 4th quarter 2023 and €2.08 per share for the 1st quarter 2023). Diluted earnings per share calculated using the same method amounted to €2.21 per share for the 1st quarter 2024 (€1.95 per share for the 4th quarter 2023 and €2.06 per share for the 1st quarter 2023).

Earnings per share are calculated after remuneration of perpetual subordinated notes.

Perpetual subordinated notes

TotalEnergies SE has not issued any perpetual subordinated notes during the first three months of 2024.

On March 20th, 2024, TotalEnergies SE notified its binding intention to fully reimburse the nominal amount of €1,500 million of its perpetual subordinated notes 1.750% issued in April 2019, on their first call date, on April 4th, 2024, resulting in its reclassification as current borrowings as of March 31, 2024.

Other comprehensive income

Detail of other comprehensive income is presented in the table below:

(M$)	1st quarter 2024	1st quarter 2023
Actuarial gains and losses	(2)	3
Change in fair value of investments in equity instruments	40	4
Tax effect	(8)	(8)
Currency translation adjustment generated by the parent company	(1,506)	1,466
Sub-total items not potentially reclassifiable to profit and loss	**(1,476)**	**1,465**
Currency translation adjustment	**1,099**	**(1,250)**
- unrealized gain/(loss) of the period	1,097	(1,334)
- less gain/(loss) included in net income	(2)	(84)
Cash flow hedge	**807**	**1,202**
- unrealized gain/(loss) of the period	763	1,022
- less gain/(loss) included in net income	(44)	(180)
Variation of foreign currency basis spread	**(15)**	**(3)**
- unrealized gain/(loss) of the period	(41)	(12)
- less gain/(loss) included in net income	(26)	(9)
Share of other comprehensive income of equity affiliates, net amount	**(76)**	**(98)**
- unrealized gain/(loss) of the period	(78)	(91)
- less gain/(loss) included in net income	(2)	7
Other	**2**	**3**
Tax effect	**(219)**	**(336)**
Sub-total items potentially reclassifiable to profit and loss	**1,598**	**(482)**
Total other comprehensive income (net amount)	**122**	**983**

Tax effects relating to each component of other comprehensive income are as follows:

(M$)	1st quarter 2024			1st quarter 2023		
	Pre-tax amount	Tax effect	Net amount	Pre-tax amount	Tax effect	Net amount
Actuarial gains and losses	(2)	1	(1)	3	(7)	(4)
Change in fair value of investments in equity instruments	40	(9)	31	4	-	4
Currency translation adjustment generated by the parent company	(1,506)	-	(1,506)	1,466	-	1,466
Sub-total items not potentially reclassifiable to profit and loss	**(1,468)**	**(8)**	**(1,476)**	**1,473**	**(7)**	**1,466**
Currency translation adjustment	1,099	-	1,099	(1,250)	-	(1,250)
Cash flow hedge	807	(223)	584	1,202	(337)	865
Variation of foreign currency basis spread	(15)	4	(11)	(3)	1	(2)
Share of other comprehensive income of equity affiliates, net amount	(76)	-	(76)	(98)	-	(98)
Other	2	-	2	3	-	3
Sub-total items potentially reclassifiable to profit and loss	**1,817**	**(219)**	**1,598**	**(146)**	**(336)**	**(482)**
Total other comprehensive income	**349**	**(227)**	**122**	**1,327**	**(343)**	**984**

5) Financial debt

The Company has not issued any new senior bond during the first three months of 2024.

The Company reimbursed two senior bonds during the first three months of 2024:

- 5.125% bond issued by TotalEnergies Capital in 2009 and maturing in March 2024 (€950 million);
- 3.700% bond issued by TotalEnergies Capital International in 2013 and maturing in January 2024 ($1,000 million).

6) Related parties

The related parties are mainly equity affiliates and non-consolidated investments.

There were no major changes concerning transactions with related parties during the first three months of 2024.

7) Other risks and contingent liabilities

TotalEnergies is not currently aware of any exceptional event, dispute, risks or contingent liabilities that could have a material impact on the assets and liabilities, results, financial position or operations of the TotalEnergies, other than those mentioned below.

Yemen

In Yemen, the deterioration of security conditions in the vicinity of the Balhaf site caused the company Yemen LNG, in which TotalEnergies holds a stake of 39.62%, to stop its commercial production and export of LNG and to declare force majeure to its various stakeholders in 2015. The plant has been put in preservation mode.

Mozambique

Considering the evolution of the security situation in the north of the Cabo Delgado province in Mozambique, TotalEnergies has confirmed on April 26, 2021, the withdrawal of all Mozambique LNG project personnel from the Afungi site. This situation led TotalEnergies, as operator of Mozambique LNG project, to declare force majeure.

Legal and arbitration proceedings

- FERC

The Office of Enforcement of the US Federal Energy Regulatory Commission (FERC) began in 2015 an investigation in connection with the natural gas trading activities in the United States of TotalEnergies Gas & Power North America, Inc. (TGPNA), a US subsidiary of TotalEnergies. The investigation covered transactions made by TGPNA between June 2009 and June 2012 on the natural gas market. TGPNA received a Notice of Alleged Violations from FERC on September 21, 2015. On April 28, 2016, FERC issued an order to show cause to TGPNA and two of its former employees, and to the Corporation and TotalEnergies Gas & Power Ltd., regarding the same facts. The case was remanded on July 15, 2021 to the FERC Administrative Judge for hearing and consideration on the merits. TGPNA brought a claim to the U.S. District Court for the District of Texas in December 2022 disputing the constitutionality of FERC's administrative procedure; the U.S. District Court for the District of Texas ordered a stay of the case in the course of 2023, pending decisions by the U.S. Supreme Court in another cases involving similar constitutional issues. TGPNA contests the claims brought against it.

- Disputes relating to Climate

In France, the Corporation was summoned in January 2020 before Nanterre's Civil Court of Justice by certain associations and local communities in order to oblige the Company to complete its Vigilance Plan, by identifying in detail risks relating to a global warming above 1.5 °C, as well as indicating the expected amount of future greenhouse gas emissions related to the Company's activities and its product utilization by third parties and in order to obtain an injunction ordering the Corporation to cease exploration and exploitation of new oil or gas fields, to reduce its oil and gas production by 2030 and 2050, and to reduce its net direct and indirect CO_2 emissions by 40% in 2040 compared with 2019. This action was declared inadmissible on July 6, 2023, by the Paris Civil Court of Justice to which the case was transferred following a new procedural law. All the claimants appealed this decision before the Paris Court of Appeal. TotalEnergies considers that it has fulfilled its obligations under the French law on the vigilance duty. A new action against the Company, with similar requests for injunction, has started in March 2024 before the commercial court of Tournai in Belgium.

Several associations in France brought civil and criminal actions against TotalEnergies, with the purpose of proving that since May 2021 – after the change of name of TotalEnergies – the Corporation's corporate communication and its publicity campaign contain environmental claims that are either false or misleading for the consumer. TotalEnergies considers that these accusations are unfounded.

In France, on July 4, 2023, nine shareholders (two companies and 7 individuals holding a small number of the Corporation's shares) brought an action against the Corporation before the Nanterre Commercial Court, seeking the annulment of resolution no. 3 passed by the Corporation's Annual Shareholders' Meeting on May 26, 2023, recording the results for fiscal year 2022 and setting the amount of the dividend to be distributed for fiscal year 2022. The plaintiffs essentially allege an insufficient provision for impairment of the Company's assets in the financial statements for the fiscal year 2022, due to the insufficient consideration of future risks and costs related to the consequences of greenhouse gas emissions emitted by its customers (scope 3) and carbon cost assumptions presented as too low. The Corporation considers this action to be unfounded.

In the United States, US subsidiaries of TotalEnergies (TotalEnergies EP USA, Inc., TotalSpecialties USA, Inc. and TotalEnergies Marketing USA, Inc.) were summoned, amongst many companies and professional associations, in several "climate litigation" cases, seeking to establish legal liability for past greenhouse gas emissions, and to compensate plaintiff public authorities, in particular for resulting adaptation costs. The Corporation was summoned, along with these subsidiaries, in three of these litigations. The Corporation and its subsidiaries consider that the courts lack jurisdiction, and have many arguments to put forward, and consider that the past and present behavior of the Corporation and its subsidiaries does not constitute a fault susceptible to give rise to liability.

- Russia

In France, two associations filed a simple complaint against the Company in October 2022 with the National Anti-Terrorist Prosecutor’s Office, due to the continuation of some of the Company’s activities in Russia since the Russian invasion of Ukraine in 2022. The complaint, which the Corporation has not been given access to, would accuse the Corporation – due to its 49%[1] holding in Russian company Terneftegas, at that time 51%-owned by Novatek and operated by said company – of complicity in war crimes committed by the Russian Air Force in Ukraine, by aiding or assisting, through the supply of kerosene to the Russian Air Force. The Corporation – which has no direct or indirect activity vis-à-vis the sale of kerosene in Russia – has strongly rejected these accusations, as unfounded in both law and fact[2].

The complaint was dismissed by the National Anti-Terrorist Prosecutor's Office in early January 2023.

The plaintiffs later lodged a new identical complaint in March 2023 with the application to join the proceedings as a civil party. In June 2023, the National Anti-Terrorist Prosecutor’s Office recommended a dismissal. The Company was informed in April 2024 that the Elder Magistrate in charge of criminal matters had decided on October 19, 2023 the dismissal of the complaint.

- Mozambique

In France, victims and heirs of deceased persons filed a complaint against the Company in October 2023 with the Nanterre Prosecutor, following the events perpetrated by terrorists in the city of Palma in March 2021. This complaint would allege that the Corporation is liable for “unvoluntary manslaughter” and, “failure to assist people in danger”. The Corporation considers these accusations as unfounded in both law and fact[3].

- Kazakhstan

On April 1st, 2024, the Republic of Kazakhstan filed a Statement of Claims in the context of an arbitration involving TotalEnergies EP Kazakhstan and its partners under the production sharing contract related to the North Caspian Sea. TotalEnergies EP Kazakhstan is currently assessing the merits of the claims contained in this statement. Therefore, it is not possible at this date to reliably assess the potential consequences, particularly financial ones, nor the date of their implementation.
